She has been seized so many times that she seems to have acquired the habit. I sent a report by the mail steamer up to the 20th, and with the exception of these seizures there is nothing new to report. The season is an unusually windy one and poor for sealing. The average catch to date is far below that of last year, and all agree that pelagic sealing is a paying investment no more. Unless others seizures are made this is the last chance to send mail before the season ends and the fleet re-
